"THE VOICE OF THE STUDENTS - - BY THE STUDENTS"

Vol. 12 - No. 7

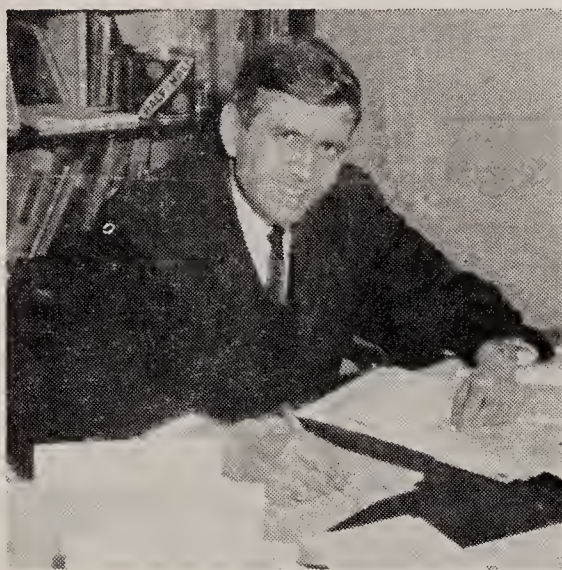

PURDUE UNIVERSITY CALUMET CAMPUS, HAMMOND, INDIANA

Special Issue

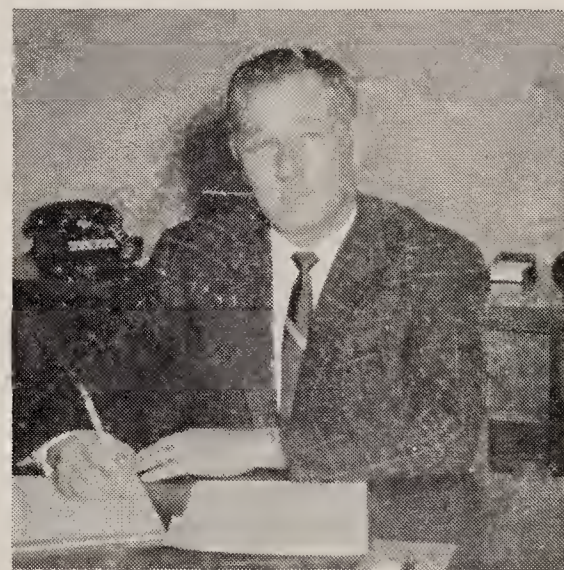

Purdue Calumet . . . WELCOMES VISITORS

CARL H. ELLIOTT
Director

HARRY H. HUBBARD
Student Affairs & Guidance Officer

RICHARD J. COMBS
Assistant Director

Future of PUCC

by H. L. Cain, Editor

In a recent interview with Dr. Elliott I learned a few things about the future of the Calumet Campus that surprised even me. For instance by September of 1966, the long awaited Technology and Shop Building is expected to be in use. In the near future the Inland Research Building will be turned over to us for use as a school of nursing. Soon after that will come a Student Union Building, an Academic Building, and a Power Plant.

By 1973 the Calumet Campus will be accommodating an estimated 10,000 students. Our present enrollment is somewhere near 2,000.

To meet this enrollment explosion, section chairmen are busy mapping the expansion of the curriculum.

OUR LEADERS

If you asked a student who the top men around here are (if he knew at all), he would tell you, Elliott, Combs, Hubbard. Few students ever see either Mr. Elliott or Mr. Combs because their work requires that they remain cooped up in their offices most of the time. But those of us who have had the pleasure of talking to them have found them to be understanding and

Dr. John S. Tuckey heads the English Department.

Dr. Harlan D. Fayle heads the Science Department.

Dr. Robert L. Anderson heads the Engineering Department.

Our faculty right now numbers about 80, but next year we are expecting to have over 100.

FENCING CLUB

The Fencing Club was formed at the beginning of the Spring Semester of 1964. It gives PUCC students a chance to achieve cultural advancement and physical fitness while learning an art almost as old as time. It is also a highly competitive and vigorous sport.

responsive to the wants and needs of the student body. The man who all the students know is Mr. Hubbard. He, in effect, is the liaison between the Administration and the students. He is also the scapegoat for the students who have a "beef" with the school. Mr. Hubbard's duties require him to be every place at once. Mr. Hubbard, being a very conscientious worker, tries to do just that; it tickles us (the students) to watch him.

FROM OUR STAFF

Welcome to Purdue University. This special issue of the student newspaper has been printed to give you a deeper insight into our campus. In it you will find a listing of the faculty and administration, some of the activities of the students, and news of our campus in general. You will also see what our student paper would normally look like.

Purdue Astronomical Society

During the 1964-65 school year, the Purdue Astronomical Society plans to continue its purpose of spreading knowledge and excite interest in the field of astronomy. The Society plans this year to continue its program of movies and field trips. Also the Society is engaged in building a simple spectrograph for the school's use. Due to a lack of funds all instruments belong to individual members and range from a three-inch refractor to a ten-inch reflector. Also, weather permitting, several starparties are being planned.

CIRCLE K

Circle K is a Kiwanis sponsored service organization for college men which operates on the campus. It is a leadership and character-building group which serves both the campus and the community. Although Circle K is not a social fraternity, it provides fun and fellowship while accomplishing many worthwhile services. To the student Circle K is an opportunity, an opportunity to help his school and community, an opportunity to meet new people and friends, but most important an opportunity to become a better man.

Here at PUCC the Circle K takes part in many activities. They sponsor an annual car smash, put out a weekly information bulletin, and assist the administration during registration and other such events. Circle K also sponsors dances at the school as well as holding social events within the club for members and guests. Circle K is an active group, ready to join in the work and the fun. Aside from its activities on the campus, our Circle K also participates in state and international conventions, at such places as Chicago, Indianapolis, and Miami. Circle K is the largest collegiate organization in North America.

PURDUE CALUMET CHORUS

The Purdue Calumet Chorus is the mixed singing group at the Calumet Campus. The organization was formed for Purdue students who like music and who enjoy representing their University at various University functions and Calumet Regional gatherings.

This year as well as last year, under the direction of Mr. David Simpson, the Purdue Chorus sang for such gatherings as the Honors Day Assembly, the Purdue Alumni Banquet, and Christmas caroling. Our motto, "No music without fun," means exactly what it says. We enjoy singing; we enjoy representing our University; and we enjoy learning more about music.

Student Chapter of Professional Engineers

The Student Chapter of Professional Engineers (SCOPE), which is sponsored by the Indiana Society of Professional Engineers, Calumet Chapter, is one of the most important clubs now in existence at Purdue University Calumet Campus.

Our main objective is to help the new student entering P.U.C.C. in any field of engineering or engineering technology to gain the proper beginning on the road that will lead to a college degree. Our other objective is to help the student understand more about the career he plans to venture upon after college. To do this, we have companies like Illinois Bell Telephone, I.B.M., American Oil, United States Steel, and many other local concerns that use engineers come in and present informative programs about their companies and how they use the engineer with a degree. We also make field trips to plants like American Oil, Dresden Nuclear Power Station, and Argonne National Laboratories (which are just a few that this community has to offer) to see the engineer at work in today's fast-moving world.

—J. N. Remich

The Spectator

DENNIS SENCHAK, A STAR OF THE PUCC BASKETBALL SQUAD WHICH FINISHED WITH A RECORD OF 1 WIN AGAINST 14 LOSSES, HAD ONE VERY EMBARRASSING MOMENT ON THE RECENT TRIP BEFORE THE MIL. TECH. GAME. IT SEEMS THAT TIM HAYES, SON OF COACH HAYES, BEAT HIM AT THE MOST VICIOUS GAME OF "OLD MAID" EVER TO TAKE PLACE. FOR MORE DETAILS, SEE DENNIS SENCHAK, JOE KOCSIS, DAVE STRAUER, ARTIE HOGGSET, OR ANY OF THE OTHERS WHO MADE THE TRIP.

The fencers recently had a match set up with the club from the U. of Chicago, but after the Chicagoans heard the word CALUMET after Purdue University, they chickened out!

Baseball season started Monday. We play across the street at "Purdue Park" which is the only ball park in the world with a left-field wall 780 feet from home plate. Have you seen that sign in Dr. Sander's window that reads: "Hit this sign, win a free A"?

THE SPECTATOR here does claim the season is open. What season? The girl-watching season, you idiots!

Sad point in a GREAT season at Indiana—the VARNARSDALE twins are leaving. Two of the greatest ball players to come out of the state of Indiana since OSCAR "BIG O" ROBERTSON are now seniors. THE SPECTATOR has no "rose" or "barb" to give, but if it did, the TWINS would get a dozen every time.

The second sad point: The retirement of BRANCH McCracken. The following appeared in the March 9 issue of the PURDUE EXPONENT:

WITH THE RETIREMENT OF BRANCH McCracken, A MAGNIFICENT ERA OF I.U. BASKETBALL HAS COME TO AN END—AND WE PERSONALLY HOPE PERMANENTLY. "THE BASKETBALL OF INDIANA UNIVERSITY," LAUDED I.U. PRESIDENT ELVIS STAHR, "IS A LEGEND OVER THE COUNTRY AND THE TOP CREDIT BELONGS TO BRANCH McCracken."

LEGENDARY IT IS. McCracken's RECORD DURING 24 SEASONS AT I.U. HAS BEEN 364 VICTORIES TO 174 DEFEATS. HE IS THE ONLY BIG TEN COACH WITH TWO NCAA CHAMPIONSHIPS. THE HOOSIERS, UNDER HIS ABLE DIRECTION, HOLD A WINNING MARGIN OVER EACH OF THEIR BIG TEN RIVALS AND HAVE WON THREE CONFERENCE CHAMPIONSHIPS AND TIED FOR ANOTHER.

THIS RECORD NEEDS NO INTERPRETATION, DOES IT?

WE, WHO HAVE HATED YOUR CREAM AND CRIMSON TEAMS, SALUTE YOU.

Be sure to enter the bowling tourney to be held soon by SCOPE.

Watch for the CIRCLE K Road-E-

American Chemical Society

The Student Affiliates of the American Chemical Society, Calumet Campus, were engaged in several activities last fall, to broaden the interest in chemistry at the extension.

Movies always served as a source of information that led to interesting discussions during several of the meetings.

Articles which appeared in the Chemical and Engineering News were often discussed. In fact, at one meeting several students reported on the diversity of several large chemical corporations, using information obtained from C and E News.

At another meeting the Affiliates discussed what the field of chemistry had to offer in the way of job opportunities and wages.

During the year we had three excellent speakers. One, from Standard Oil, discussed mass spectrometry. Another, from the N.A.S.A., talked on the chemistry of rockets and satellites. And finally, a speaker from Sherwin Williams talked about paints, varnishes, and resins.

Student papers were the source of material for several meetings. Many affiliates, who had been required to write research papers for Organic Chemistry, gave fifteen to twenty minute talks on their particular subjects. Some of these topics were infrared spectroscopy, mass spectrometry, desalination of sea water, and resins, to name a few. These talks proved to be interesting to all who attended, and thus, many of the meetings were open to all students at the extension.

O. This event will be open to the public.

Ban boxing.

THE SPECTATOR wishes to thank Coach BOB HAYES for allowing him to accompany the basketball team to Milwaukee. Also, thanks for picking up the tab for the "orgy" afterwards.

Watch for more action on the intramural basketball scene. This year more teams competed than ever before. Once more, thanks, Mr. Hayes, for putting up with all these "athletes."

THE SPECTATOR thinks that the recent banning of several swimmers is very childish and thinks that some of the sanctioning units need revision.

Listen to THE TOM LANHAM SPORTS SPECIAL on WJOB (1230) week-nights at 5:30.

Who is Rose Bimler?

I love sports! I eat fried basketball nets and creamed basketballs for breakfast, hockey pucks for lunch, and track spikes with tennis balls in butter sauce for supper. If you can identify me, send my name to the sports editor, % THE BOILERMAKER.

Ban boxing and THE SPECTATOR.

Dr. Hartman Comments

The International Relations Club

The International Relations Club is one of the oldest clubs at PUCC and is concerned with world affairs education, not merely as an extra-curricular organization, but existing as an addition to a well-rounded college education. It affords our students the opportunity to take an active interest in political and world affairs, an understanding which is so vital in our modern society. The I.R.C. exists not only for potential politicians and students of political science, but for every student of Purdue, whether he be a future engineer, scientist, or teacher.

The I.R.C. stimulates understanding of the world of power politics and international relations by extending to its members, as well as to the entire campus community, such programs as well-qualified speakers, educational movies, tapes of T.V. news specials, and trips to regional and national conventions. In addition, the I.R.C. takes an active role in presenting dances and social gatherings which are so much a part of college life.

Purdue's I.R.C. is affiliated with the National Association of International Relations Clubs, which is composed of more than 18,000 members on some 600 college campuses. We were the head for the Midwest Region clubs, some 60 in number, and held a regional convention in October at Lafayette. Students from five states gathered to discuss world affairs and, in addition, heard two top State Department officials, one of whom was the Undersecretary of State, Averill Harriman.

Because of the nature of today's world, one of shrinking distances and critical world relations, every citizen has the responsibility to himself and his fellow man to have at least a basic knowledge of national and international affairs. Since the college students of today are the leaders of tomorrow, they have even more reason to be well-informed, and it is to this end that the INTERNATIONAL RELATIONS CLUB exists.

PI SIGMA KAPPA

Pi Sigma Kappa, commonly known as Girls' Club, is the only club at PUCC designed specifically for women. When originally founded several years ago, its main purpose was to unite the women students. Since that time, however, the club has undertaken many social and service projects which have been of benefit to the University as well as to the members. We have worked hard on projects such as decorating the lounges at Christmas time, collecting food baskets for needy families, and sponsoring dances. A beatnik dance, sponsored jointly with the Circle K last spring, was one of Purdue's most successful social events.

FINE LINES:
—Sometimes it is better to put off until tomorrow what you are likely to botch today.

BYLINE

by Walter G. Babcock

Welcome to the 1965 Open House of the Calumet Campus of Purdue University.

This particular column appears each month to report to the student body the activities of its student government. Since this is a souvenir issue, I will present instead a picture essay of the activities at this campus.

Since March is non-conformist month at PUCC, the Circle K Club, a service group sponsored by the Hammond Kiwanis club, declared March 5 as "slob" day. In their publicity releases, they requested that instead of thinking like slobs, dress like one. Here is one student, right, who did not contribute to the day. The object was to raise some school spirit by allowing everyone to let his hair down for this one day.

AROUND THE WORLD in 165 days —Miss Sigrid Stark, associate professor of English, holds one of her souvenirs from a 165-day trip around the world. It's a rhino that was hand-carved by African native. (Gary Post-Tribune photo)

Between Aug. 7, 1964, and last Jan. 19, Miss Stark toured 22 countries on 39 flights and 18 airlines. Having prepared her own itinerary, she confined her trip to Europe, Africa, and Asia.

Two of the many highlights of the trip were the two cities which are internally separated by walls. She toured both East and West Berlin,

but was only allowed on the one side of Jerusalem because of her tour to the Arabic countries.

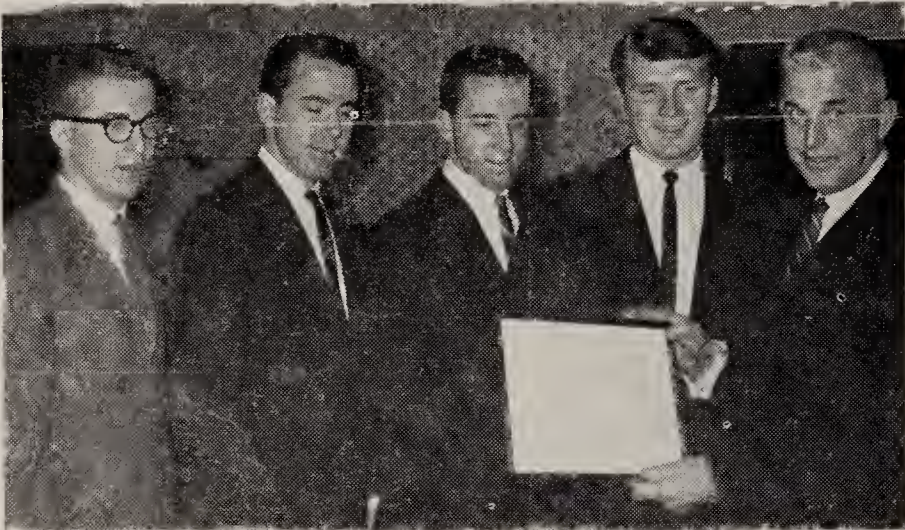

Other highlights were Pearl Harbor, Hiroshima, and the Czechoslovak town of Lidice, which was ordered destroyed by Hitler in 1942.

In Africa, Miss Stark toured Kenya, Egypt, Ethiopia and Tanganyika. During a safari in Kenya, she stayed in a hotel actually built in trees and called Treetops.

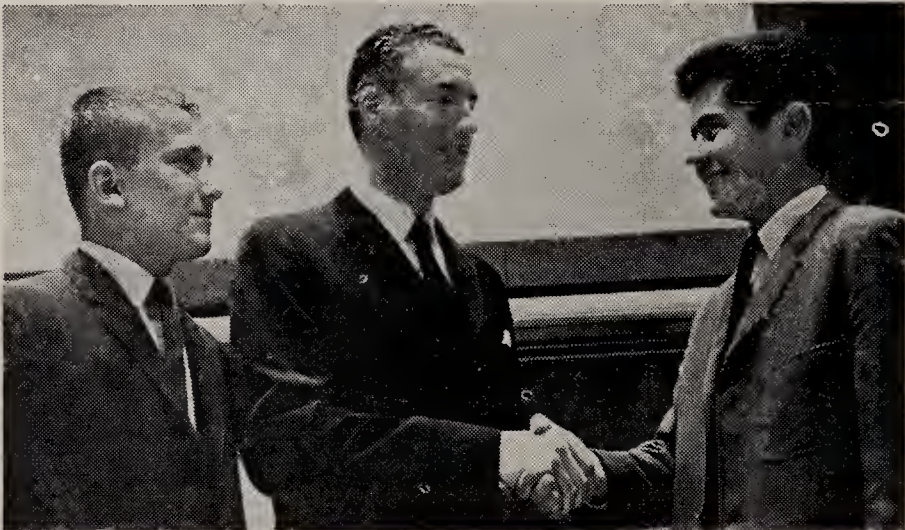

Guests at Treetops ascend to the hotel in the mid-afternoon for an overnight stay to observe animals coming in under it to feed on the salt licks immediately below. At night the area is lighted. Fifty-six elephants, baboons, many buffalo, rhinos, and wart hogs were observed while she was there. Nairobi was her headquarters while in Kenya.

In Tanganyika at the Aboseli Reserve, from which Mt. Kilimanjaro can be seen, several lions were observed. By far the most exciting event was the charging of an enraged rhino at her mini-bus. Fortunately the rhino was bluffing and turned away just short of impact.

Of 400 slides and 800 feet of motion picture film, perhaps the most amusing picture is of two buffalo pulling a lawnmower. They're cutting the grass at the Taj Mahal.

A FIRST FOR PURDUE CALUMET—The Student Chapter of Professional Engineers (SCOPE) at Purdue Calumet Campus received its national charter Tuesday night, February 23, at a dinner during National Engineers Week. It is the first chapter in Indiana. From left are: Jerry Sako, treasurer; Pete Thiel, secretary; Pat Thiel, vice-president; Jack Banaszak, president of SCOPE; and Arthur Geberin, president of the Calumet chapter of the Indiana Society of Professional Engineers, who made the charter presentation. (Gary Post-Tribune photo)

STUDENTS HEAR CRIME-FIGHTER—Robert Priesol, upper right, student council president, greets Francis Lynch before Lynch's talk to an assembly of about 60 students and faculty members Wednesday, March 3. Lynch traced crime and corruption problems in Lake County. Left to right: Walter Babcock, lecture series chairman and Purdue Calumet correspondent for the Gary Post-Tribune; Lynch, executive director of the Northwest Indiana Crime Commission; and Priesol. (Gary Post-Tribune photo)
